## HSRM Primtile<sup>®</sup> Roofing

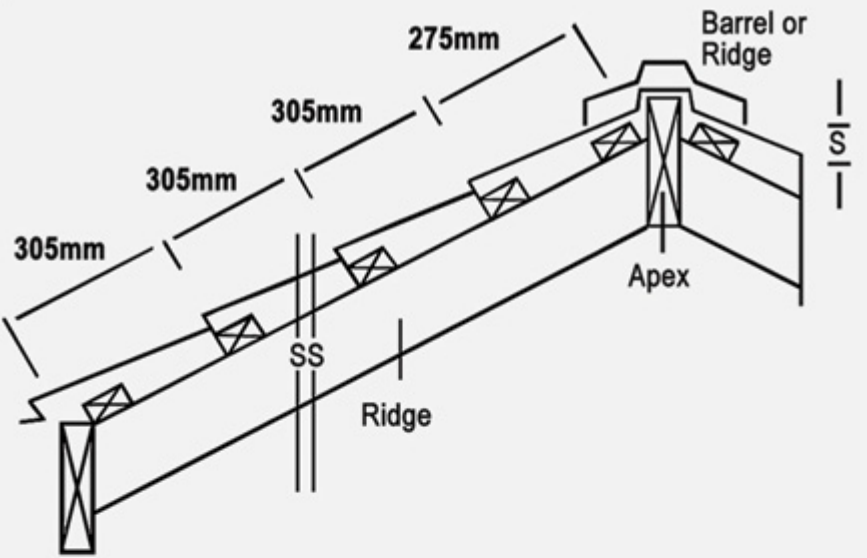

## Recommended Size For Steel Battens

Recommended size for steel battens	
Rafter centers	Batten size
Up to 2000mm	HB25
Up to 2700mm	HB40
Up to 3500mm	HB60

Primtiles Roofing are supported on roof battens on the rafters. Tack the eaves battens against the fascia board. Then set and tack the second batten to 305mm from the eaves batten. Lay the rest of the battens

to the module length 305mm across the rafter, up to the ridge and track them in position. (Fig 1). Batten are cut to length so they butt together on top of the rafters. (Fig 2)

**(Fig 1)**

**(Fig 2)** Primitile available in mill finish and aluminium color coated finish.
