Stainless Steel Bathroom  
Hardware Typical Product Catalogue

## Product Features

### 1 Good Mechanical Properties

Stainless steel has good tensile strength, yield strength and other mechanical properties. Its strength, hardness is much higher than copper, aluminium, zinc alloy and other common-used materials. It has resistance to deformation, abrasion resistance and large bearing.

### 2 Strong Corrosion Resistance

Hand polishing surface is more compact. The surface formed chromium oxide has strong corrosion resistance. The high quality CF8 or 304 stainless steel can bear up to 300 hours salt spray test.

### 3 Easy to Judge Product Quality

Stainless steel bathroom products usually has polishing finish. It can be judged quality by eye directly. Do not need to worry about coating problem.

### 4 Long Service Life

Stainless steel bathroom products have good properties of mechanical and corrosion resistance. If it is installed properly and maintained well, that can be used for decades or even longer.

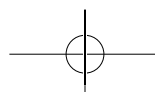

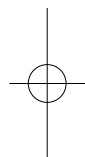

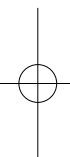

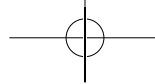

### 5 Easy Cleaning and Maintenance

Polishing finish is not easy to attach dust, therefore, it is convenient to clean and maintain. And, it can ensure products to look new for a long time, and will not fall off coating or oxidation.

### 6 Environment Friendly

Stainless steel does not contain lead and other harmful heavy metals. The material is safe to make faucet.

### Details Determine Success or Failure

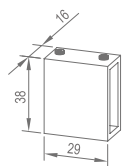

In *LaoZi's Tao Te Ching*, it writes "The difficult things start from the easy, as the great things start from details". As we know, "Details determine success or failure ". Since detail embodies taste, detail shows difference, detail determines quality and quality embodies the brand value. Therefore, KIN LONG starts from every detail, shows professionalism in details and perfects the details.
